

Full STEAM ahead into May we go!

(S)CIENCE: The important lessons on Protecting Planet Earth continue this month. We will be teaching children how they can help each and every day to keep our planet healthy, clean and able to take care of us. Our planet produces food for us on land and in our bodies of water. Our planet produces oxygen for us to breathe from the trees and plants on land and in the bodies of water that cover parts of our planet. We need to care for our planet and we can do so in many ways. This month we are going to learn about recycling, what can be recycled and what the benefits of recycling are. We hope to teach this lesson in such a way that begins a life time of compassion for the planet we live on. We hope to not just talk about caring for our planet but give the children skills that they can use to protect it each and every day at home, at school, out on a walk, on a day at the beach etc... We will also be learning all about the Rainforest and the important part the Rainforest plays in our life each and every day. We will learn about the animals that live there, the plants that we use for food, medicine and how the structure of the rainforest plant life is unique with its layers and competition for sunlight. The Rainforest produces so much of our oxygen we breathe and protection of not only the plants but the animals that live there is crucial to the health of our whole planet.

(T)ECHNOLOGY: Together with recycling comes the topic of trash and the advances in technology that help us deal the huge amount of trash we produce daily, weekly and yearly in our homes, our schools, our factories, our restaurants, our construction sites etc... We will teach your children about where trash goes after they put it in the trash can, how litter and pollution affects our world, and what they can do to limit the trash they put into our landfills. The latest technology in garbage pick-up, sorting and landfills will be introduced your children. As we talk about our need for seeds, planting a garden and about plants in general around our playground, our homes, our community and the world, we will introduce the concept of composting our food waste and nourishing the soil that helps nourish these important plants. We will also learn about Rainforests around our planet and teach the children how important rainforests are to our world. Awareness is the key and teaching awareness at a very young age and continuing to teach it throughout a child's life creates sensitivity to the important issues and hopefully betters our world. With knowledge comes compassion and love. We hope to generate all the compassion and love we can when it comes to our planet Earth. We will also begin teaching the lesson of extinction and what animals are endangered at this time. We will learn where they live and what we all can do to help protect these animals so they do not become extinct. We hope your children love learning about our planet Earth and what they can do to take care of it.

(E)NGINEERING: will be introduced in the topics of Trash and Recycling. Engineering skills practice fills your child's day as they build with blocks creating towers; finding out what it takes to tip them over; and solving problems that arise as they attempt to create their construction masterpieces. They will be using mixed materials to build with which presents them with engineering problems they must solve. This designing, building and problem solving continues out on the playground and in many of the learning center lessons during the day and continues at home as well. Your child's teacher will continue STEAM learning by asking those all important open-ended questions as well as creating problem scenarios that they then have to solve. You too can continue the learning at home by doing the same. Construction and hydro engineering continue this month in the art room and in the sand box as well.

(A)RT: May Day and Cinco de Mayo are two days of celebrations that start this month out as we continue to teach and learn about holidays and celebrations in the United States and around the world. Please share with your child's teacher if there is a holiday or celebration your family celebrates that you would like us to share with the children at Kids Klub throughout the year. Our 2, 3 and 4 year olds as well as our School-Age children and our Teachers are always excited to learn about special celebrations and if possible we will have you come in in-person, share stories and bring with you special articles that will help demonstrate and teach about this celebration. While we can only scratch the surface of the meaning of each holiday or celebration we love to start the conversation and awareness of the celebrations valued by our Kids Klub children and families. Mother's Day is also in the month of May and we want to give special tribute to all of our Kids Klub Mothers and Grandmothers this month. We will be learning about why Mothers and Grandmothers are special, reading stories, singing songs and sharing stories throughout this special week. This month we will also be honoring our Teachers with Teacher Appreciation Week. Our teachers are so essential to our children's successful learning and development. Their hard work and dedication to each and every child is a cause for celebration. Please talk to your children about all their teachers. Share with them how special it is to have a caring, kind, and knowledgeable teachers that teach them all kinds of lessons all throughout the day. Our teachers' work is never done - from Circle Time to Blocks and

Trains and Outdoor Play Time to Art, our teachers are always looking for opportunities to turn everyday play and routine into learning concepts and making connections to a learning concept that will touch each child in the special way each child learns. Some children learn through music and some learn from completing a worksheet. Other children learn through playing with blocks while others learn from painting a picture. Our teachers get to know each child and the unique way they learn. And while we celebrate the teachers, our teachers will be having fun teaching your children.

MATH: at Kids Klub comes in so many forms. Kitchen Creation teaches the children about measuring using measuring cups and measuring spoons, counting and fractions. Math is also learned through role playing in Hoppy's Home, Diner and in Hoppy's General Store where they shop for food, pay for the food and then go cook up a meal for their friends and families. From "baking" pies with quarter pie pieces fitting together to make a whole complete pie, to "cutting" fruit in half or quarters to feed the babies, fractions are a focus in several of our learning centers. Counting, patterns, number building with pegs, spatial skill building with puzzles to matching games for color, numbers and patterns continue the math lessons in our Puzzles and Manipulatives Room. Math lessons are reinforced in art lessons, sandbox play, circle time and dancing and exercise steps in music and movement and balance and coordination. Math is everywhere at Kids Klub and at Kids Klub we make learning math fun!

When you come to drop off, pick up or just visit, listen carefully to the children and their teachers discussing math, science, engineering and technology concepts in so many ways all throughout the day. And if you are lucky to witness one of our art sessions or kitchen creation sessions, you will see how everyday activities like making playdough or painting a picture bring STEM teaching even to the art tables. Our teachers know how and love to take play and turn it into full STEAM learning through the activities they demonstrate & introduce to the children. Through the questions they ask and the problems they create for the children to solve, learning continues at more and more advanced levels. It is fun and exciting to watch this learning happen at each age level and in each learning center. And year after year, your child's knowledge of the concepts grow more in-depth building confidence as well as knowledge, awareness, compassion and excitement to learn more.

Please take time to review your child's learning experience at Kids Klub and use this information to further the learning experience at home. Ask specific questions about each day and let your child share the exciting time they had at school. This month we will be focusing on caring for our Earth and we hope you will continue these lessons at home with recycling projects. You can extend the lessons by bringing gloves and a trash bag on a family walk and picking up some trash that someone else carelessly allowed to litter our street or playgrounds. If you head to the beach, be aware of the trash and plastic that can be dangerous to our water and the animals that live there and continue the clean-up efforts. If everyone does a little part, the positive impact on our planet will be great. We hope you enjoy reading about and being a part of what your child will be doing each and every day at Kids Klub.

May is an exciting and important month of learning.

Sincerely,

Bambi Wojciechowski
Curriculum Director

Monthly theme: Mothers, Teachers & Protecting Planet Earth are Important!

WEEK **Weekly theme:** Teachers are Important, May Day, Cinco de Mayo Fun **Numbers:** 1-20, 1-30
Letters: Aa - Zz, Tt is for Teacher, Aa is for Apple **Colors:** Red and Blue **Shapes:** Apples, pencils and review of all geometric shapes **Patterns:** Apple, Pencil, Apple, Pencil, ABABABAB, 121212

Daily Circle: Pledge of Allegiance to the Flag, calendar, months, days of the week, numbers, seasons, weather, fruits/vegetables, colors, shapes, story time, songs, and animals (English and Spanish) Zoo Phonics, Patterns, Teachers are Important, My Education is Special, What is Teacher Appreciation Day? A Career in Teaching, Why become a teacher? A teacher is essential and an important part of the community. Community Helpers What is May Day, Cinco de Mayo, Culture and Heritage sharing and learning.

Song suggestions: Teacher says

Who came to school today?
 Teacher is a special friend
 The color is...
 ABC Song

Books: Read an Assortment of Books with the themes:

Teachers are Important
 When I grow up I want to be a Teacher
 Going to School to learn from my Teacher
 Taking Care of our Earth and it's animals

	Monday	Tuesday	Wednesday	Thursday	Friday
Art AM	Work on Mother's day gifts, Handmade Card, and handmade wrapping paper or decorated bag.	Work on Mother's day gifts, Handmade Card, and handmade wrapping paper or decorated bag.	Work on Mother's day gifts, Handmade Card, and handmade wrapping paper or decorated bag.	Work on Mother's day gifts, Handmade Card, and handmade wrapping paper or decorated bag.	Work on Mother's day gifts, Handmade Card, and handmade wrapping paper or decorated bag.
Art AM & PM	Then: Make a Class Poster all about the teachers in your class. Find out what their favorite color is? Do they have a pet? What they like to do on the weekend? Use multimedia with the children - collage, paint, draw, sparkles, natural items etc.. to share about the great teachers in this class	Outdoor Art - if weather permits head outside for some outdoor painting. Teacher's choice on what to paint with? Brushes, cars, balls, sticks leaves?	Write Tt is for Teacher at the top of large easel paper and let each child paint a portrait of their teachers doing something they love about them.	Aa is for Apple and it is time to do some apple art. What does this mean? It is totally up to your teacher. Have fun.	Teacher's Choice Art Lesson - Paint, Cut and Glue? Lace a Pasta Necklace? Draw? Color, Markers, Watercolor Fun? Collage? Tissue Paper Tearing? Foam Painting? Up to them

Balance & Coordination: Let the children make a great big obstacle course just for their teacher. Put in things your teacher likes to do and then have her do the obstacle course in honor of Teacher Appreciation Week. After she does the obstacle course the whole class can have fun doing the obstacle course too. Then let your teacher decide what you all will do next - it is Teacher's Week and Teacher's Choice

Blocks/Trains: **Lesson 1:** Build a school house that is perfect for your teacher. Share with your class how you have designed the school for your teacher and why (reinforce weekly theme and self-confidence)
Lesson 2: Teacher's Choice Block Activity - what is their favorite blocks and what do they like to build - everyone build it with your teachers. (learning to care about what others like and encourage teamwork)

Library: Listen to and act out to the stories about Teachers and Going to School - read all throughout the day starting at circle time, and the beginning of each learning center lesson, at lunch time and snack times, nap time and at the end of the day. Sound out words along the way and have them use their Zoo Phonics skills to do this. Discuss vocabulary along the way and act out any parts of the stories possible so the children connect books, words and stories to actions in real life. (enhance listening, comprehension skills, build self esteem)

Manipulatives: Teacher's Choice Math Practice with manipulatives - use an assortment of manipulatives to sort, count, add and subtract. Then utilize the toys you are using to enhance learning adding in lessons on patterns, colors & shapes as you go along. Please remember to re-sort each of the sets of manipulatives and find all the pieces so

the sets are complete. Next – Teacher’s Choice to enhance spatial and problem solving skills with puzzles and if the puzzles are easily solvable, use 2 puzzles and mix up the pieces so that solving each puzzle is more challenging. (math skills, fine motor, matching, sorting, shape, counting and spatial skills)

Music and Movement: Inside or Outside –Teacher’s Week so Teacher’s Choice – what are the fun music and movements your teacher loves to do with the children?

Social Science: Lesson 1: Social Science: Teacher’s Are Special –all about becoming a teacher, what you need to learn to become a teacher and what the teacher job looks like each day. **Science 2:** Take Science Outside and let nature be the teacher of science today. Breathe in the fresh air, stretch your body and feel your muscles stretch – use your senses to study the world – close your eyes, what do you hear? Use your eyes, what do you see? Use your fingers to touch natural things in the play yard like tree bark and leaves – what do they feel like? Use your nose to smell the tree bark, the leaves, the wood chips, the air? What does it smell like? Teachers –Use this time to share with the children in the class what you like about being outdoors? What do you like about teaching science? What is your favorite subject in science? (develop understanding and appreciation, caring, gratitude)

Theater: Plan and act out a Teacher’s Appreciation party with music & dancing – first stand on stage and announce to your class what you like about your teacher. Then act out 1-2 things your teacher does that makes you happy. Then once everyone is done with this exercise – turn on the music and dance with your teacher to celebrate her.

Dramatic Play is all about your Teachers this week. Hoppy’s General Store, Home and Schoolhouse Play: Interview your teacher about what her favorite foods are. What do your teachers eat for breakfast, lunch and dinner? What is their favorite dessert? Then plan a menu and “shop” for a Teacher Appreciation luncheon or tea –pick out your Teacher’s favorite foods and share with your class what you have chosen. Have fun cooking up those favorite foods along with also cooking up healthy meals for your class. Set the table, have your teacher sit down and serve her a favorite meal that you all have cooked up. Have fun cleaning, organizing, working in the workshop, planting a garden, mowing the lawn and taking care of the babies too. It is still a little cool outside so dress the babies warmly on those days and if the weather has turned warm, be sure the babies do not get too hot. And don’t forget to take the babies to school and teach the babies what you are learning at school just like your teachers do for you. Learning new things is very important and you will want your babies to learn all about the things your teachers are teaching you so they learn too. Gears, Felt, Magnets are fun learning toys too.

Kitchen Creations: We will continue our creative teaching of math skills and fine motor development with playdough making this month. This week, the children will be measuring and mixing up a batch of playdough for their teacher. They will help their teacher create beautiful creations that their teacher will get to keep in honor of teacher appreciation week. Let their creations dry, add paint, glitter, sparkles, natural elements if necessary. As usual, talk about the measurements of each of the ingredients along with allowing the children to mix the playdough slowly and carefully. This process will help teach valuable lessons. This will not only teach basic math but strengthen their fingers coordination which will lead to enhanced writing and cutting ability as well as other fine motor activities enhancement in self care such as putting on shoes, zipping up a zipper, snapping, buttoning, lacing and more. Kitchen Creation also helps teach the skill of patience, following directions, taking things one step at a time and in a proper order for success. This week they will again practice the lesson of making something special for others. Learn to care about others enough to find out what colors, shapes, animals, foods a person likes and then creating the perfect gift is an important lesson this month. This week your children will learn special information about their teachers, people they trust and care about and with this trust and love comes learning.

Monthly theme: Mothers, Teachers & Protecting Planet Earth are Important!

WEEK 36 Weekly theme: Mothers are Special Letters: Aa - Zz, Mm for Mother, Gg is for Grandmother
 Numbers: 1-20, 1-30 Colors: Pink and Purple Shapes: Hearts and Flowers
 Patterns: Heart, Flower, Heart, Flower, ABABABAB, 121212

Daily Circle: Pledge of Allegiance to the Flag, calendar, months, days of the week, numbers, seasons, weather, fruits/vegetables, colors, shapes, story time, songs, and animals (English and Spanish) Zoo Phonics, Patterns, Mothers and Grandmothers are Special, My Family is Special, Good Hygiene review - washing hands, sneezing into a tissue or arm

Song suggestions: Mom says
 Three kisses for mother
 Mommy is a special friend
 The color is...
 I love you, You love me

Books: Read an Assortment of Books with the themes:
 Mommy and Me
 Grandma and Me
 Mother's are special
 Taking Care of our Earth and it's animals

	Monday	Tuesday	Wednesday	Thursday	Friday
Art	Work on Mother's day gifts, Handmade Card, and handmade wrapping paper or decorated bag.	Work on Mother's day gifts, Handmade Card, and handmade wrapping paper or decorated bag.	Finish up wrapping Mother's day gifts, handmade card etc.. and have fun giving her the special gifts you have made for her	Finish up wrapping Mother's day gifts, handmade card etc.. and have fun giving her the special gifts you have made for her	Easel and Finger Painting day, enjoy time creating beautiful art outside or inside.

AM & PM Art: If you are finished with your Mother's Day Gifts, Cards and Wrapping, use these art sessions to paint your playdough creations for Mom & Grandma and complete the Art Session and Projects you were not able to do last week during Teacher Appreciation Week due to Mother's Day Projects.

Balance & Coordination: It is time to practice walking slow, walking fast, jumping, hopping on 2 feet, hopping on 1 foot, crawling balance walking on the balance beam or on a line on the carpet, on the stepping stones. Then have fun balancing the egg on the spoon & doing the above then bean bag and ring toss practice. (enhance gross motor skills)

Blocks/Trains: Room 1: Build something special for Mom and share with class (reinforce weekly theme and self-confidence)
Room 2: Build train tracks & roads with friends- drive trains & vehicles on your creation(encourage teamwork)

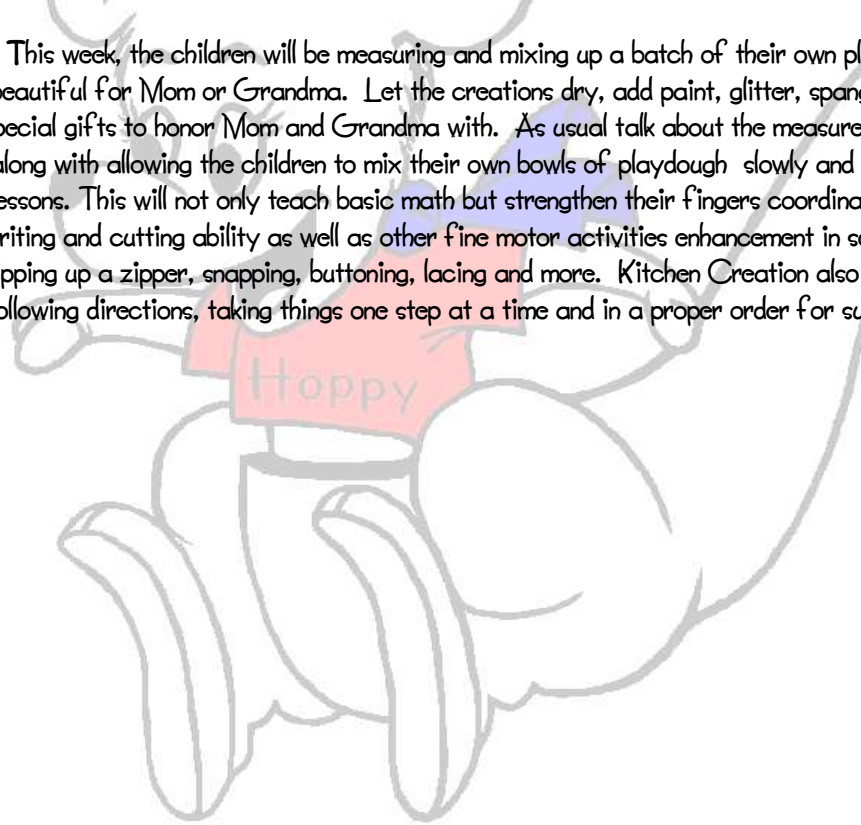

Library: Listen to and act out to the stories about Mommies - read all throughout the day starting at circle time, and the beginning of each learning center lesson, at lunch time and snack times, nap time and at the end of the day. Discuss vocabulary along the way and act out any parts of the stories possible so the children connect books, words and stories to actions in real life. (enhance listening, comprehension skills, build self esteem)

Manipulatives: Math Practice with manipulatives - Choose a few sets of manipulatives to teach and practice sorting, counting, adding and subtracting. Then using the same set of toys enhance the lesson by teaching patterns, colors & shapes. Please remember to re-sort each of the sets of manipulatives and find all the pieces so the sets are complete. Next - enhance spatial and problem solving skills with puzzles. If the puzzles are easily solvable, use 2 puzzles and mix up the pieces so that solving each puzzle is more challenging. (math skills, fine motor, matching, sorting, shape, counting and spatial skills)

Music and Movement Use the instruments, make music, sing and create our own Mother's Day songs. Dance to songs Mom would like. Practice your Yoga Poses as you read through a Yoga story and don't forget to Stretch your body up to the sky and down to the ground. Lay on your backs - stretch your arms way up and your feet way down, deep breathe, close your eyes - what do you hear? What do you smell? Use your senses to study the world. Discuss what your are hearing and feeling as you do this.

- Science:** Social Science -Lesson 1 and 2: Mother's are Special - learn about Mothers and Grandmothers-Read books, sing songs and celebrate our Mothers & Grandmothers. Use this time to also work on your Mother's Day gifts, cards, and wrapping paper of gift bags as needed. (develop appreciation, caring, gratitude)
- Theater:** Plan and act out a Mother's Day party with music & dancing, hopping, twirling, laughing and having fun! What would you do if you were throwing a party for your Mother? What would you serve? How would you decorate? Discuss with your class and then have fun acting out a Mother's Day party with your class. (creative play)
- Dramatic Play is all about Mother's Day this week. Hoppy's General Store, Home and Schoolhouse Play:** Plan a menu and "shop" for a Mother's Day luncheon or tea -pick out your Mom's favorite foods and come back together to share with your class. Then, have fun cooking up those favorite foods along with also cooking up healthy meals for your family like Mom does. Like Mom does at your home, have fun cleaning, organizing, working in the workshop, planting a garden, mowing the lawn and taking care of the babies too. It is still a little cool outside so dress the babies warmly on those days and if the weather has turned warm, be sure the babies do not get too hot. And don't forget to take the babies to school and teach the babies what you are learning at school.
- Kitchen Creations:** This week, the children will be measuring and mixing up a batch of their own playdough and creating something beautiful for Mom or Grandma. Let the creations dry, add paint, glitter, spangles and wrap them up for extra special gifts to honor Mom and Grandma with. As usual talk about the measurements of each of the ingredients along with allowing the children to mix their own bowls of playdough slowly and carefully will help teach valuable lessons. This will not only teach basic math but strengthen their fingers coordination which will lead to enhanced writing and cutting ability as well as other fine motor activities enhancement in self care such as putting on shoes, zipping up a zipper, snapping, buttoning, lacing and more. Kitchen Creation also helps teach the skill of patience, following directions, taking things one step at a time and in a proper order for success.

Monthly theme: Mothers, Teachers and Protect Planet Earth are Important!

WEEK 37 **Weekly Theme:** Let's Talk Trash- Recycling Helps Our Earth **Letters:** Aa - Zz, Tt for Trash, E for Earth Rr for Recycling **Numbers:** 1 - 20, 1-30 **Colors:** Green and Blue **Shapes:** Earth and Recycling Symbols and what they mean **Pattern:** ABCABC

Daily Circle: Pledge of Allegiance to the Flag, calendar, months, days of the week, numbers, seasons, weather, fruits/vegetables, colors, shapes, story time, songs, and animals (English and Spanish) Zoo Phonics, Patterns, What is the name of the planet we live on? What is the planet covered in? What is land? What is water? Water comes in the form of lakes, oceans, rivers. What lives on the land? What lives in the ocean? How can we help keep the land and water healthy on our planet? What is recycling how does it work? Earth Day everyday

Song Suggestions: Today is...

Hello how are you
Pick it up
Recycle for our earth
This is number...

Books: Read and Assortment of Books with the themes:

Taking Care of Our Earth
Rainforest Animals
Trash and Recycling
Mothers and Teachers are Special and Important

	Monday	Tuesday	Wednesday	Thursday	Friday
Art	Paint a shapes collage using recycled objects to paint with like tubes, lids, containers etc...	Create a trash and recycling collage showing lots of items that can be recycled	Make a large class recycling art Creation from trash to display.	Cut/tear and paste a recycled paper picture collage	Create a Personal recycling art creation using recycled trash.

PM Art: Blue and Green Finger-painting - the Earth is Beautiful & Nature Scenes Watercolor Creations

Balance & Coordination: Practice taking care of our earth by gathering "trash" and having "throw-away" races and relay races to the trash cans. Then play "recycle" basketball too! Make sure you get the right recycling materials in the right baskets. Have fun with this very valuable lesson. (enhance large motor skills)

Blocks & Trains **Lesson 1:** Build a community with roads, train tracks, rivers, boat docks, community buildings and homes. Add people pets and vehicles. Make sure that everything is connected by a road, rail or boat so that supplies can be delivered and trash and recyclables can be removed from each place and taken to the recycling centers. (understanding community, planning, creative self expressive play)
Lesson 2: Build a trash & recycling center with blocks and vehicles-talk about how it works and make sure the vehicles can get in to drop off all the trash and recyclables. (awareness of makes caring for)

Library: Read all about our Earth and how our planet is covered by land or water. Read about the different living plants and animals occupy each of these areas. Read books about how we can help care for our Earth and specifically this week we will be discussing the trash that is produced by humans in many forms at many different locations from our home to our work and school and factories. Discuss the books you read and always talk about the solutions to some of the problems we have with trash we can help with each and every day - read all throughout the day starting at circle time, and the beginning of each learning center lesson and make connections to what the children will be doing at each learning center lesson. Then read at lunch time and snack times and our theme of Trash and recycling can be directly addressed during our meal times. At Kids Klub we pay to have all of our trash recycled by our waste company. Discuss recycling different parts of our food waste and composting food scraps at home. Don't forget to read at nap time and at the end of the day. Sound out words along the way and have them use their Zoo Phonics skills to do this. Discuss vocabulary along the way and act out any parts of the stories possible so the children connect books, words and stories to actions in real life. (enhance listening, comprehension skills, build self esteem)

Manipulatives: Recycling Math Practice with recyclables and manipulatives - use an assortment of manipulatives to sort, count, add and subtract. Utilize the toys you are using to teach to enhance colors & shapes as you go along. Please remember to re-sort each of the sets of manipulatives and find all the pieces so the sets are complete. Next -enhance spatial and problem solving skills with puzzles and if the puzzles are easily solvable, use 2 puzzles and mix up the pieces so that solving each puzzle is more challenging. (math skills, fine motor, matching, sorting, shape, counting and spatial skills)

Music and Movement: Inside or Outside – Read Yoga Stories and do all the yoga poses in the books holding for as long as you can hold them. Breathe deep and stretch your body to get the best results from your exercise session. Next play musical recycling items by placing items that can be recycled on the ground and having each child stand near a piece of recycling trash – then play the music, remove one item and when the music stops have each child stand by a piece of trash, the child without an item gets to run the music for the next round. Repeat removing a piece of recycling trash until you are down to the last piece and the last child. Have fun and talk about the pieces of recycling so the children are learning how water bottles and other pieces of trash are recyclable.

Science: **Science 1:** Recycling and Where Does Our Trash Go? (learning about recycling)
Science 2: Animal Kingdom: What is a Rainforest and why do we need to protect it-science video

Theater: Puppet Play Time – put on a puppet show about taking care of the earth and all the ways that children like you can help care for our planet each and every day. Then read books with puppets about taking care of our planet and other stories about animals that live on our earth and why they need us to protect them and our earth from litter and pollution.

Dramatic Play: Hoppy's General Store, Home and Schoolhouse Play: This week dramatic play in all of these learning center play times will focus on recycling and how we can help our earth as we live our lives each day. As the children shop for items and play house, talk with them about what containers can be recycled and what can be composted. Composting can be done with left over food scraps of fruits and vegetables, grains like bread and pastas, yard clippings, tea bags, newspaper, cardboard and after time these items break down into nice soil we can use in our gardens. There are food items that should not be included in the composter but to keep it simple in this important lesson, let's assume all of the above without limitations can be added. Have them recycle any other types of recyclables into the recycling buckets we add to our playhouse as part of this lesson. Have fun cooking up all those yummy foods along with also cooking up healthy meals for your class. Set the table, have your friends sit down and serve them all you have cooked up. Have fun recycling, composting, cleaning, organizing, working in the workshop, planting and working in the garden, mowing the lawn (don't forget that yard clippings can be composted) and taking care of the babies too. It is still a little cool outside so dress the babies warmly on those days and if the weather has turned warm, be sure the babies do not get too hot. And don't forget to take the babies to school and teach the babies what you are learning at school. Teach them all about caring for the Earth and how we can all help every day to keep our planet healthy and specifically about recycling of our trash.

Kitchen Creations: This week, the children will be measuring and mixing up a batch of playdough and rolling it out, cutting it, and turning it into special creations using all recycled objects for tools. For example, Roll out the playdough with water bottles or other recycled objects that could work like a rolling pin. Cookie cut the dough with lids and containers, design creations and use recycled trash for parts of the creations as needed. Have fun using trash to create treasure. As usual, talk about the measurements of each of the ingredients along with allowing the children to mix the playdough slowly and carefully. This process will help teach valuable lessons. This will not only teach basic math but strengthen their fingers coordination which will lead to enhanced writing and cutting ability as well as other fine motor activities enhancement in self care such as putting on shoes, zipping up a zipper, snapping, buttoning, lacing and more. Kitchen Creation also helps teach the skill of patience, following directions, taking things one step at a time and in a proper order for success.

Monthly theme: Mothers, Teachers and Protecting Planet Earth are Important!

WEEK 38 Weekly theme: Life in a Rainforest Letters: Aa- Zz, R for Rainforest, Ee is for extinct and endangered
Numbers: 1 – 20, 1-30 Colors: Colors in a rainforest Shapes: Triangles and Diamonds Pattern: ABCDABCD

Daily Circle: Pledge of Allegiance to the Flag, calendar, months, days of the week, numbers, seasons, weather, fruits/vegetables, colors, shapes, story time, songs, and animals (English and Spanish) Zoo Phonics, Patterns, What is a rain forest? Where are rain forests around the world? How do rain forests help us? Why do we need to protect our rain forests and what can we each do to help protect the rain forests and animals that live in them. What does the word extinct mean? What animals are almost extinct? Endangered animal awareness

Song Suggestions Who came to school today...

- Kookaburra
- Five lil monkeys swinging in a tree
- The itsy bitsy spider
- Head shoulders knees and toes

Books: Read and Assortment of Books with the themes

- Rainforest Animals
- Trash and Recycling
- Taking Care of Our Earth
- I Can Make a Difference

	Monday	Tuesday	Wednesday	Thursday	Friday
Art	Begin a Classroom Mural on Butcher Paper by cutting out and painting or markers rainforest leaves and trees	Next make a toucan or other Rainforest bird that lives in the trees in the rain forest	Next: Color and cut a monkey and other types of animals that live in the rainforest. Make more rainforest plants and trees	Make a paper plate rain forest snake and create any other animals, insects, or plants that your rainforest mural may need.	Put together the whole rainforest mural using butcher paper and all the art projects from the whole week- color & create as needed

PM Art: All things Natural Collage Creation, Painting with natural objects – what kinds of creations can you make?

Balance & Coordination: Navigate through a rainforest of “trees” ducking under but be careful of the “quicksand” hula hoops-go around, and navigate the fallen tree (balance beams or taped lines on the floor) and beware of the river. Use the stepping stones to stay clear of the animals that live there. Keep going with the rain forest themed obstacle course adding more and more items that the children have to navigate through to enhance coordination as well as generate lots of fun. Gross physical movements paired with learning concepts help a child learn quickly so have fun teaching about the rainforest through this Obstacle Course. (gross motor skills and science)

Blocks & Trains: Lesson 1: Let’s use blocks and animals to build a rainforest (promote imagination)

Lesson 2: Trains and tracks, floor blocks & legos have fun building (learn shapes, stacking & sorting)

Library: Continue reading about planet Earth and add in books and stories that incorporate rain forest lessons about the animals that live there, the ways that rain forests help us each and every minute of our lives and why we should protect our rain forests all around the world. Read all throughout the day starting at circle time, and the beginning of each learning center lesson, at lunch time and snack times, nap time and at the end of the day. Sound out words along the way and have them use their Zoo Phonics skills to do this. Discuss vocabulary along the way and act out any parts of the stories possible so the children connect books, words and stories to actions in real life and themes at school. (enhance listening, comprehension skills, self esteem)

Manipulatives: Use an assortment of manipulatives to sort, count, add and subtract. Find animal shaped activities to show our love of the animals all over the earth. Utilize the toys you are using to teach to enhance colors & shapes knowledge as you go along. Please remember to re-sort each of the sets of manipulatives and find all the pieces so the sets are complete. Next – Enhance spatial and problem solving skills with puzzles and if the puzzles are easily solvable, use 2 or 3 puzzles and mix up the pieces so that solving each puzzle is more challenging. Find the animal puzzles to tie in the learning concepts with our spatial skill building sessions. (math skills, fine motor, matching, sorting, shape, counting and spatial skills)

Music and Movement: **Go Outside in Nature** – Dance in the sunlight and breathe the fresh air that the trees in the forests and the seaweed in the sea makes for us. Celebrate our beautiful planet and remember to always look for ways to keep it clean. Go on a walk to make sure there is no litter in our play yard. Use your senses and listen with your ears, look with your eyes, smell with your nose and touch with your hands. Close your eyes. What do you hear? What can you smell? Open your eyes and look all around you. What can you see that makes you happy? Is there something you see that makes you sad? If so, talk about how you could help make this better so it doesn’t

make you sad. We can all make a difference by caring for our planet in kind and loving ways. Use this music and movement time to sway to pretty music in the beauty of our planet.

Science:

Science 1: Animal Kingdom, lets learn all about the rainforest. How can we be a part of protecting the rainforest and all the animals in it and why we want to do this? Why is the rain forest important to us and the entire world? Read about the rain forest, look at all the different types of plants and animals that live in the rain forest. Learn how the trees and plants of the rain forest offer us oxygen and medicines that we need to live on our planet. And also learn how the trees use the carbon dioxide we breathe out to live on this planet and in exchange produce us oxygen to breathe.

Science 2: Rainforest animals- endangered species and how we can help - learn all about animals that are endangered and what conservation work is being done to help these animal populations through protection programs. Learn what we can do to be a part of saving this endangered animals. Learn the names of these animals, see what they look like, what their babies look like and even hear how they sound and what they like to eat and where they live. (build animal awareness and love.)

Theater:

Rainforest Animal Puppet Show- Create a puppet theater with recycled boxes or use one of the puppet theaters at Kids Klub. Make and use animal puppets and share what you have learned about rain forest animals and animals that are endangered. Have fun putting on a show for your friends and take turns putting on shows so that everyone has a turn. Plan what you are going to share and work together with a few of your classmates so that several animal puppets are in the play. Have fun. After the puppet shows are over, act out your favorite rain forest animals and see if your classmates can guess what animal you are acting out. Make sure all the puppets get put back on the puppet stand and everything is put away nice and neatly for the next class coming to the theater.

Dramatic Play: Hoppy's General Store, Home and Schoolhouse Play: This week dramatic play in all of these learning center play times will focus on caring for our planet, recycling and how we can help our earth as we live our lives each day. As the children shop for items and play house, talk with them about what containers can be recycled and what can be composted. Composting can be done with leftover food scraps of fruits and vegetables, grains like bread and pastas, yard clippings, tea bags, newspaper, cardboard and after time these items break down into nice soil we can use in our gardens. There are food items that should not be included in the composter but to keep it simple in this important lesson, let's assume all of the above without limitations can be added. Have them recycle any other types of recyclables into the recycling buckets we add to our playhouse as part of this lesson. Have fun cooking up all those yummy foods along with also cooking up healthy meals for your class. Set the table, have your friends sit down and serve them all you have cooked up. Have fun recycling, composting, cleaning, organizing, working in the workshop, planting and working in the garden, mowing the lawn (don't forget that yard clippings can be composted) and taking care of the babies too. It is still a little cool outside so dress the babies warmly on those days and if the weather has turned warm, be sure the babies do not get too hot. And don't forget to take the babies to school and teach the babies what you are learning at school. Teach them all about caring for the Earth and how we can all help every day to keep our planet healthy and specifically about recycling of our trash. Remember that reciting back to others, the baby dolls and our families helps us retain what our teachers are teaching us.

Kitchen Creations: This week, the children will be measuring and mixing up a batch of their own playdough. Make something special that represents what you have learned about in our Rain forest lessons. What is your favorite rainforest animal? Or what is something special you can do to help the rain forest stays healthy? Let the creations dry and paint them to they can be taken home as a reminder to all of our responsibility and commitment to take care of our planet Earth and the importance of the rain forest. As usual, the talk about the measurements of each of the ingredients along with allowing the children to mix their own bowls of playdough slowly and carefully will help teach valuable lessons. This will not only teach basic math but strengthen their fingers coordination which will lead to enhanced writing and cutting ability as well as other fine motor activities enhancement in self care such as putting on shoes, zipping up a zipper, snapping, buttoning, lacing and more. Kitchen Creation also helps teach the skill of patience, following directions, taking things one step at a time and in a proper order for success.
